Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

none of the prior art of record discloses or suggests an electrosurgical apparatus comprising in part the combination of the following:

an electrosurgical return electrode having a bulk impedance (as defined in patent no. 6,454,764 by reference and wherein the bulk impedance is greater than 4000 ohm-cm) sufficient to limit the current density to safe levels (below the level which would burn the patient); and

an inductor or a reactance coupled in series with the return electrode, wherein the inductor counteracts at least a portion of the effective impedance of the return electrode and the patient or wherein the reactance in series is configured to increase the flow of the electrosurgical current counteracting a portion of an effective impedance caused when a patient is in contact with the return electrode.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roy D. Gibson whose telephone number is 571-272-4767. The examiner can normally be reached on Tu-Th, 7:30 am-4:00 pm.
